Subject: IYUZEH® Availability Update

Dear Eye Care Professional,

We are writing to provide an important update regarding the availability of IYUZEH® in the United States.

As shared in May, the supply has been impacted by manufacturing and import constraints affecting the sole contract manufacturing facility that produces IYUZEH® for Thea Pharma Inc. Based on our current inventory projections, U.S. supply of IYUZEH® is expected to become unavailable beginning in early October 2026. At this time, we anticipate that IYUZEH® will be unavailable in the United States for a prolonged period.

We recognize this will create challenges for your practice and for patients who have benefited from IYUZEH®. We sincerely regret this anticipated disruption and are sharing this update now to give you as much time as possible to plan for your patients' care.

This interruption is related to manufacturing and importation requirements and is not the result of any identified safety or quality concern with IYUZEH® currently available in the United States.

We will communicate any significant updates regarding the availability of IYUZEH® if further information becomes available.

If you have any questions or need additional information, please contact Thea Pharma Medical Information by:

- Email: MedicalAffairs.US@theapharma.com
- Telephone: 1-833-838-4028

Thank you for your continued partnership and for the care you provide to your patients.

Sincerely,

Thea Pharma Inc.
